

Striped Bass Anglers!

Massachusetts *Marine Fisheries* is studying the temperature preferences of striped bass. Temperature recording tags (see below) will be adhered to bass from Plum Island Sound in June.

The tags (and data) can be recovered only with your help. If you catch a striped bass with this tag, please remove it and call Gary Nelson at 978-282-0308 x114. **Rewards** are available. Thank You!
